

PART I - SECTION C
STATEMENT OF WORK

The contractor shall furnish all labor, equipment, supplies and materials required to provide vegetation control service for the Federal Aviation Administration (FAA). This service is to cover the location(s) specified below.

SCOPE OF WORK:

The Contractor shall provide preventative vegetation control at facilities within the Marquette System Support Center (MQT SSC) located in the State of Michigan.

MATERIALS:

- a. Contractor furnished: All chemicals, labor and equipment necessary to perform the required vegetation control services shall be contractor furnished.
- b. Government furnished: None.

REQUIREMENTS:

- a. Provide vegetation control service on a prescribed basis to the following locations:

SAW #1-906-346-3806

225 Airport Ave. Gwinn, MI 49841

ESC #1-906-789-9402

3300 Airport Rd. Escanaba, MI 49829

IMT #1-906-774-7652

700 S. Stephenson Ave. Iron Mountain, MI 49801

RHI #1-715-369-3032

3375 Airport Rd Rhineland, MI 54501

CMX #1-906-482-1070

23810 Airpark Blvd. #110 49913

IWD #1-906-932-5460

5560 Airport Rd. Ironwood, MI 49938

- b. Apply **pre-emergence herbicide and sterilant** to prevent any growth of vegetation on the gravel plots and roads of the sites listed above. Any vegetation that is already growing at the time of application shall also be treated to kill such vegetation. Contractor shall be responsible for any re-application of herbicide if any vegetation grows up during the contract period, at no cost to the government.
- c. Contractor shall prevent any overspray of surrounding crops/vegetation/animals/people/livestock/water supplies outside the gravel plot, and prevent any leaching of the chemicals into surrounding areas outside the plot. Contractor is responsible for all damages due to any such overspray and/or leaching.

- d. The herbicides and other chemicals used for treatment must be applied at a time, which will cause the least inconvenience to the employees on duty, and during normal working hours/days – Monday through Friday between 8:00 AM and 3:00 PM. The actual time must be coordinated at least three business days in advance of the planned visit with the FAA System Support Center Manager, or his delegated representative. Therefore, the time of application will depend upon the area being serviced and as directed by the Contracting Officer's Technical Representative (COTR). The Contractor will be escorted by FAA Specialists at all sites, and it is required to be within sight of the COTR while on the airport and/or the FAA site. Building access and escort will be coordinated by the COTR.
- e. It is assumed that the services described in this specification will satisfactorily control the vegetation at each of these facilities without additional treatments per the highest industry standard. However, should it be necessary to provide additional treatments during the contract period, the services shall be performed without additional expense to the Government.
- f. All residues resulting from execution of the work shall be removed at the completion of the application.
- g. The Contractor agrees to submit, for each item prior to award, a Material Safety Data Sheet, meeting the requirements of 29 CFR 1910.1200(g) and the latest version of Federal Standard No. 313, for all hazardous material identified in paragraph (b) of this clause. Data shall be submitted in accordance with Federal Standard No. 313, whether or not the apparently successful offeror is the actual manufacturer of these items. Failure to submit the Material Safety Data Sheet prior to award may result in the apparently successful offeror being considered non-responsible and ineligible for award.
